Senior Backend Developer (Perl)

The responsibility of the Technology and Engineering department lies in the conception, development, quality assurance and operation of central information systems, data warehouse and BI applications, as well as information and customer portals.

Role description

- Participation in the collection and review of technical requirements
- Support of the product owner in planning and cost estimation
- Reverse engineered / refactored and maintained our existing Perl code base
- Conception, development and expansion of software components and data structures/models
- Planning, execution and automation of software tests (unit and integration tests)
- Preparation and support of user/acceptance tests
- Documentation of software systems, data models and interfaces
- Monitoring and ensuring operation and system availability
- Active participation in troubleshooting the software solutions and bug fixing as part of the support concept

Must have skills:

- Completed degree in computer science or comparable training with an IT background
- Several years of professional experience (5+) in Perl development (Perl 5)
- Good SQL knowledge and good Linux knowledge
- Experience with distributed software development (Git / GitLab)
- Experience in an agile working environment (Scrum / Kanban) and knowledge of Python 3 would be an advantage
- Independent and customer-oriented way of working
- Very good knowledge of spoken and written German and English

What noris offers:

- People-oriented culture, team spirit and passion for information technology
- Professional and personal development. Budget for training opportunities, seminars, mentoring and internal training for shaping and realizing your career goals
- Flexibility in work schedule
- Competitive compensation package
- Private health insurance
- Great work-life balance
- Team building events, outdoors bonding activities, pizza breaks, cinema nights and special occasion celebrations
- Well-located offices close to Thessaloniki's city center

About noris:

noris is a high-tech company specialized in IT. It was founded in 2016 in Thessaloniki and it is a subsidiary of noris network AG, which has over 30 years of experience in IT technologies in Germany. The company provides customized IT solutions in the areas of IT outsourcing, Cloud Services and Network & Security. Technological basis of these services is a powerful IT infrastructure that relies on noris network's own high-performance backbone and multiple high-security data centers which are located in Nuremberg, Munich and Hof.

Our mission: Modernizing and securing IT Infrastructure.
Our vision is to become the best provider for modern & high security IT services.

We look forward to receiving your application (with the earliest possible entry date), ideally via email.

We will be happy to help you with further questions.
